BR604 and BR606 COMPONENTS	3-C5
ACCESSORIES	4-C5

Due to the diversity in state/provincial, local and federal laws and codes that govern the design and application of architectural products, it is the responsibility of the individual architect, owner and installer to assure that products selected for use on projects comply with all applicable building codes and laws. United States Aluminum exercises no control over the use or application of its products, glazing materials and operating hardware and assumes no responsibility therefor.

The rapidly changing technology within the architectural aluminum products industry demands that United States Aluminum reserve the right to revise, discontinue or change any product line, specification or electronic media without prior written notice.
