

## CRL AWS Standard Aluminum Windscreen System

- **Accepts 1/4" to 1/2" (6 to 12 mm) Thick Glass for the Creation of Attractive and Functional Glass Barriers**

The AWS Standard Aluminum Windscreen System was developed to provide an attractive, maintenance-free glass wall that will enhance any residential or commercial application. All AWS Standard Systems can be used in conjunction with a concrete slab, block wall or individual footings. If our stock components do not fit your application, allow us to design a system that can. CRL has the ability to design, engineer and fabricate a custom system that will satisfy not only your need for safety and security, but also your artistic tastes. For additional information, contact CRL Technical Sales at (800) 421-6144 in the U.S., or (877) 421-6144 from Canada, and ask for Ext. 7730. You can also e-mail us through our web site at [crlaurence.com](http://crlaurence.com). From the home page click on Contact Us, and then click on Technical Sales.

**Visual Appeal** – The Homeowner will love the clean look of this wall and the virtually unobstructed view it provides.

**Noise Reduction** – The AWS Standard System is superbly suited as a sound wall along busy streets and highways. Our system provides a much higher sound transmission rating than conventional fencing.

**Maintenance** – The AWS Standard System is low maintenance. All components are specially coated to prevent corrosion and ensure that the homeowner will be satisfied for many years.

**Flexibility** – The AWS Standard System adapts to a wide variety of terrain and wall designs. It can easily handle slopes, steps, and curves. In addition, the system is ideal for pool areas, decks and balcony applications.

**Lead Time** – We carry 36" (914 mm), 48" (1219 mm), 60" (1524 mm), and 72" (1829 mm) posts in stock, allowing CRL to respond almost instantly to your needs. This system can be installed during almost any phase of construction, allowing the builder or contractor important scheduling flexibility.

**Integrity** – The AWS Standard System has been designed to provide a safe, transparent fence during high wind conditions. All glass installed must be fully tempered to meet all safety requirements and building codes.

**Price** – Because of this efficient design, our system is priced very competitively to other less attractive alternatives, such as wrought iron or wood fencing.
