

EXTREME WEATHER IS UNPREDICTABLE, OUR LEAD TIME IS NOT

DH-350 and DHS-500 SERIES Hurricane Resistant Entrances and Storefronts

HIGH PERFORMANCE IMPACT SYSTEMS ARE IN STOCK, READY FOR PICK UP
ALSO AVAILABLE IN DARK BRONZE ANODIZED

CRL-U.S. Aluminum's high quality, code-compliant systems are available in the most popular finishes to meet your project's needs on time. Now a part of our popular Stock Door Program, our DH-350 Series provides a high-performance entrance solution with immediate availability. In addition to our Kynar White and Kynar Bronze painted finishes, we also offer our impact systems in Clear and Dark Bronze Class 1 Anodized and White Polyurethane® 3500 finishes, giving you the options and flexibility to match the rest of your project.

- Finish Options to Provide Consistency Throughout Your Project
- Stock Inventories to Ensure Short Lead Times
- Engineered to Meet and Exceed Code Requirements

CRL-U.S. Aluminum will continue to supply your custom storefront and entrance needs, and will maintain flexibility in meeting scheduling requirements. All of our systems are backed by a team of engineers, CSI/CDT certified technical sales representatives, and product specialists. Our storefronts provide maximum protection with design flexibility and the highest level of project support. Find out how CRL-U.S. Aluminum can make your job easier by calling us at (305) 888-0077.

Strength, Reliability, and Quality Backed by Dual Certification

CRL-U.S. Aluminum Storm Front™ Hurricane Resistant Systems are designed to provide optimal protection in regions prone to hurricanes and other severe weather. Our full line of impact systems has received dual certification and full compliance with Miami-Dade County Notice of Acceptance (NOA) and Florida Product Approvals by providing strong defense against high winds, wind borne debris, and water infiltration.

Engineered and constructed with exceptional build quality, CRL-U.S. Aluminum Entrances and Storefronts meet strict Florida Building Commission and other local and national building codes and regulations. CRL ensures that architects, glazing contractors, and clients receive the best products for their at-risk commercial and residential projects.

DH-350 and DHS-500

CRL-U.S. Aluminum produces Storm Front™ glazing systems to meet a range of hurricane threats, from coastal exposure to lower risk inland conditions.
