

CURTAIN WALLS

SERIES 2100 CURTAIN WALL

- Vertically Butt Glazed
- 2-7/8", 4", and 5" (73, 102, and 127 mm) Back Member Depths
- Exterior Glazed
- Injection Molded Water Deflectors
- Thermally Improved
- Pressure Bar Glazing
- No Exposed Fasteners
- Screw Spline or Shear Block Assembly

Series 2100 Curtain Wall is a vertically butt glazed curtain wall for low to mid-rise applications where exterior glazing is desired. Complementing the efficiency of insulating glass, Series 2100 Curtain Wall is thermally improved by a continuous thermal spacer interlocked within the horizontal pressure plate. Two-tone colors can be achieved by specifying different finishes for the exterior face covers and interior mullions. A unique split vertical mullion for straight-in installation of each bay, special perimeter members for easy anchorage, and the option to shop install is achieved with screw spline assembly.
